- Citrus Peels & Halve Shells
- Above products in Organic versions.
- Tomato Juice
- Nut Pastes

Company profile:

F.T.S. was established from the experience of Dr. Giuseppe Nocilla and Dr. Biagio San Martino, both of whom are present in the Italian citrus-products sector for more than 30 years. F.T.S. was founded in 1994 and today is present in all the European markets for raw materials and semi-finished industrial fruit products as well as in the Japanese, Middle-East and American Markets.

F.T.S specialises in the study and development of products to their client's requirements. At present time, apart from their own blending station and cold store in the duty free zone of the new container port of Gioia Tauro (South of Italy), F.T.S processes its specialised products in about 20 different plants between Sicily and Calabria.
