Company profile:

Medibel is a Belgian company owned by a charitable foundation for the benefit of children in distress settled in Geneva. It was founded in 1960, but only in the 1980's under the direction of a French trading house, the company started its current activities of making tailor made blends, mainly orange for the juice industry.

Over the years the product mix has gradually developed into today's modern cocktails of many different fruits with flavours, vitamins, minerals and the new generation of functional food ingredients.

Medibel is a contemporary company with a worldwide network of specialists in the field of supply and sourcing, quality assurance and product design, manufacturing, sales and logistics.
